Packed by weight, not volume

Revenge Fly Beater Fly & Odor Reducer

GENERAL INFORMATION

REVENGE Fly Beater Fly & Odor Reducer is fast acting and repels horn, stable, house, horse, deer, and garbage flies, gnats, fleas, mosquitos and ticks. It can be used inside horse stables, dairy barns, milking parlors, paddocks around livestock and horses and chicken coops. The granules have a pleasant scent and will leave the area smelling fresh and pleasant.

Flies breed in warm, moist, organic materials such as manure, garbage, lawn clippings, decaying plant material, or soils contaminated with any of these materials. Regular removal (at least once per week) of organic materials is the key to a successful fly control program. This will break the life cycle of the fly, preventing the production of more adult flies by limiting their breeding sites.

FOR USE IN LIVESTOCK STALLS

Stable flies, also called "biting flies" feed on mammalian blood and can give a painful bite. Stable flies live around areas where livestock animals (horses, cattle, sheep, etc.) are present or that are close to the livestock facilities. Stalls and Pens should be cleaned daily, barns and corrals should be cleaned once a week to break fly life cycles.

APPLICATION RATES

REVENGE Fly Beater Fly & Odor Reducer is ready to use: no mixing, no water. Simply broadcast granules from this container or use a lawn spreader at a rate of 10 ozs. per 1,000 sq. ft. Initial treatments and severe infestations may require heavier applications. For Horse stalls, apply at a rate of approximately 1 oz. per 10 x 10 sq. ft. stall.

REVENGE Fly Beater Fly & Odor Reducer is also effective in reducing annoying horsefly, deerfly and other flying insects around home pool, patio and porch areas, use 10 ozs./1,000 sq. ft. to treat twice the area to be occupied.

For garbage cans lightly sprinkle granules in, on, and around each receptacle. Keep lids tightly closed, and surrounding areas as clean as possible.

EFFECTIVENESS OF TREATMENT

Starting one hour after application, one treatment may be effective for up to two weeks. Temperature, moisture level, and wind may affect effectiveness.

Re-apply after stall clean outs if necessary.

For even better results, use in combination with Revenge Fly Catcher Ribbons, Fly Reels, Barn & Stable Fly Spray and/or Revenge Fly Sticks.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that the ingredients qualify for exemption from registration under FIFRA.

First Aid

Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, flush with plenty of water. In case of skin irritation, wash area thoroughly with soap and water. Seek medical attention if irritation persists.

Storage and Disposal

Store and transport in an upright position. Store only in original container, in a dry place inaccessible to children and pets. Do not reuse empty container. Discard empty container in trash. Other Precautions: Do not apply directly to water. Not for aquatic use. Not for food use.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with label directions.
