Life on earth cannot survive without a dynamic soil ecosystem.

MIGHTY PLANT™ INSTANT COMPOST TEA™

Mighty Plant™ Instant Compost Tea is a water soluble microbial powder used as an alternative to traditional brewing of compost tea. This plant amendment contains specific growth promoting microbes that enhance nutrition driven plant growth and yield. Simply dissolve in water and use, no brewing required.

This product can be used as a foliar or root drench application in propagation and all stages of plant growth.

CONTAINS NON-PLANT FOOD INGREDIENTS

| Biologicals | CFU/Gram |
|----------------------------|------------------------|
| Bacillus amyloliquefaciens | 7.65 x 10 ⁸ |
| Bacillus licheniformis | 4.50 x 10 ⁷ |
| Bacillus megaterium | 4.50 x 10 ⁷ |
| Bacillus subtilis | 4.50 x 10 ⁷ |

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

Keep sealed and store in a cool dry place.

NET WEIGHT: 1 LB. (454 grams)

DIRECTIONS

Always use unchlorinated water.

If using chlorinated water, fill a container and let it sit overnight, uncovered to lessen chlorine impact.

Indoor Plants (Soil or Soil-less Media): Dissolve 1 teaspoon (2.8 grams) per gallon of water and apply every 2 weeks when watering.

Outdoor Plants: Dissolve 2 teaspoons (5.6 grams) per gallon of water and apply every 14-21 days. For larger solutions, mix 1 lb. (454 grams) per 100 gallons of water.

Clones/Cuttings: Mix 1 teaspoon (2.8 grams) per gallon of water and soak propagation media/cube with solution.

Foliar Spray: Dissolve 2 teaspoons (5.6 grams) per gallon of water or 1 lb. (454 grams) per 100 gallons of water and spray foliage every 2-3 weeks.

Hydroponics: Dissolve 2 teaspoons (5.6 grams) per gallon of water or 1 lb. (454 grams) per 100 gallons of water, applying every 2 weeks throughout the grow and bloom stages adjusting as needed.

Shrubs, Flowers and Vegetable Gardens

Rows: Evenly spread 1/2 cup (80 grams) per every 10 feet of row or 1 cup per 100 square feet and water in.

Foliar Spray: Mix 2 teaspoons (5.6 grams) per gallon of water and apply as a foliar spray to tops and bottoms of leaves.

Transplanting: Dissolve 2 teaspoons (5.6 grams) per gallon of water and immerse in roots solution...or mix into the planting hole soil before covering roots, using the amount in the table below.

| Pot Size/Trunk Caliper | Amount to Apply |
|-------------------------------|------------------------|
| 2"-4" | 1 teaspoon |
| 6"-8" | 1 tablespoon |
| 10" | 2 tablespoons |
| 1"-2" caliper..... | 4 tablespoons |
